

CÚRAM FOR MEDICAL ASSISTANCE

Cúram for Medical Assistance transforms and modernizes medical assistance and disability programs with a powerful, proven set of business tools and processes.

Government providers of medical assistance and disability programs need solutions that not only modernize but transform the way they do business. Facing a changing philosophy focusing on outcomes, an increasing demand for services while struggling with high worker turnover, complex and often changing legislation and antiquated legacy systems, agencies are incapable of meeting current, much less future business needs. Organizations need solutions that accurately determine the most appropriate mix of benefits and services to best serve the client; integrate service delivery throughout the enterprise spanning multiple programs, benefits and services; are scalable, flexible and easily interface with existing systems; and can be implemented quickly, with less risk and with a low total cost of ownership.

Cúram for Medical Assistance is the only commercial-off-the-shelf (COTS) integrated service delivery solution that equips organizations with a powerful, proven set of business tools and processes.

CÚRAM FOR MEDICAL ASSISTANCE

- Supports multiple models of medical assistance including government subsidized insurance

- models requiring client payment of premiums
- Integrates service delivery by allowing agencies to share evidence and business processes and determine eligibility across multiple programs
- Automates the complexities associated with eligibility and entitlement determination using pre-populated rule sets that can be easily appended and modified

In support of the Patient Protection and Affordable Care Act (PPACA), Cúram for Medical Assistance enables agencies to improve the efficiency and effectiveness of managing eligibility and enrollment services for a wide range of medical assistance and disability programs, including Medicaid. Cúram for Medical Assistance delivers the rules, evidence, and streamlined eligibility to support the requirements mandated by the PPACA.

Cúram for Medical Assistance delivers a comprehensive set of business processes, rules, and evidence. The Cúram solution enables organizations to efficiently screen clients, automatically determine eligibility, and integrate service delivery for multiple needs-based programs, including income, food, and medical support assistance. Cúram for Medical

Cúram for Medical Assistance is the only commercial off-the-shelf (COTS) solution that integrates service delivery, allowing agencies to share evidence and determine eligibility across multiple programs.

Assistance integrates seamlessly with other solution components for an enterprise wide solution providing holistic service delivery, integrated case management, service planning, and financial and provider management.

CÚRAM FOR MEDICAL ASSISTANCE KEY FEATURES & BENEFITS

- Outcome based delivery model is client focused and client centric
- Provisions for complex processes including Children's Health Insurance Program (CHIP), spend-down, Long Term Care processes and retroactive eligibility
- Cúram for Medical Assistance includes evidence, rules, and business processes for mandatory U.S. Medicaid coverage groups, as well as optional programs, such as Long-Term Care, Refugee, Emergency Medical Assistance, and Breast and Cervical Cancer
- Enables compliance for U.S. Health Care Reform (PPACA) requirements for enhanced eligibility and enrollment for Medicaid programs
- Complex eligibility rules and processes are managed by the system to enhance caseworker decision-making and effectiveness
- Cascading eligibility allows administrators to set program hierarchy and prioritize programs and allows for single or multiple program eligibility results to deliver the optimum benefits to clients based on their unique circumstances
- Integrated verification and evidence management tools ensure the accuracy of client information
- Change-in-circumstance processing supports retroactive changes in data and automatically reassesses client benefits
- Eligibility summaries and budget sheets display details on how eligibility is determined for medical assistance coverage groups
- Enables agencies to easily configure and extend the solution using Cúram's extensive administrative and development tools, speeding the deployment and simplifying the maintenance of the system
