

# Cúram Certified Developer (CCD) V6

## Exam Number

CS0-006

## Exam Title

Cúram Certified Developer (CCD) 6

## Why Achieve this Certification?

The CCD exam validates your understanding of the fundamentals of Cúram development. Cúram-certified developers have demonstrated the knowledge and skills required to use the Cúram Application Development Environment™ effectively.

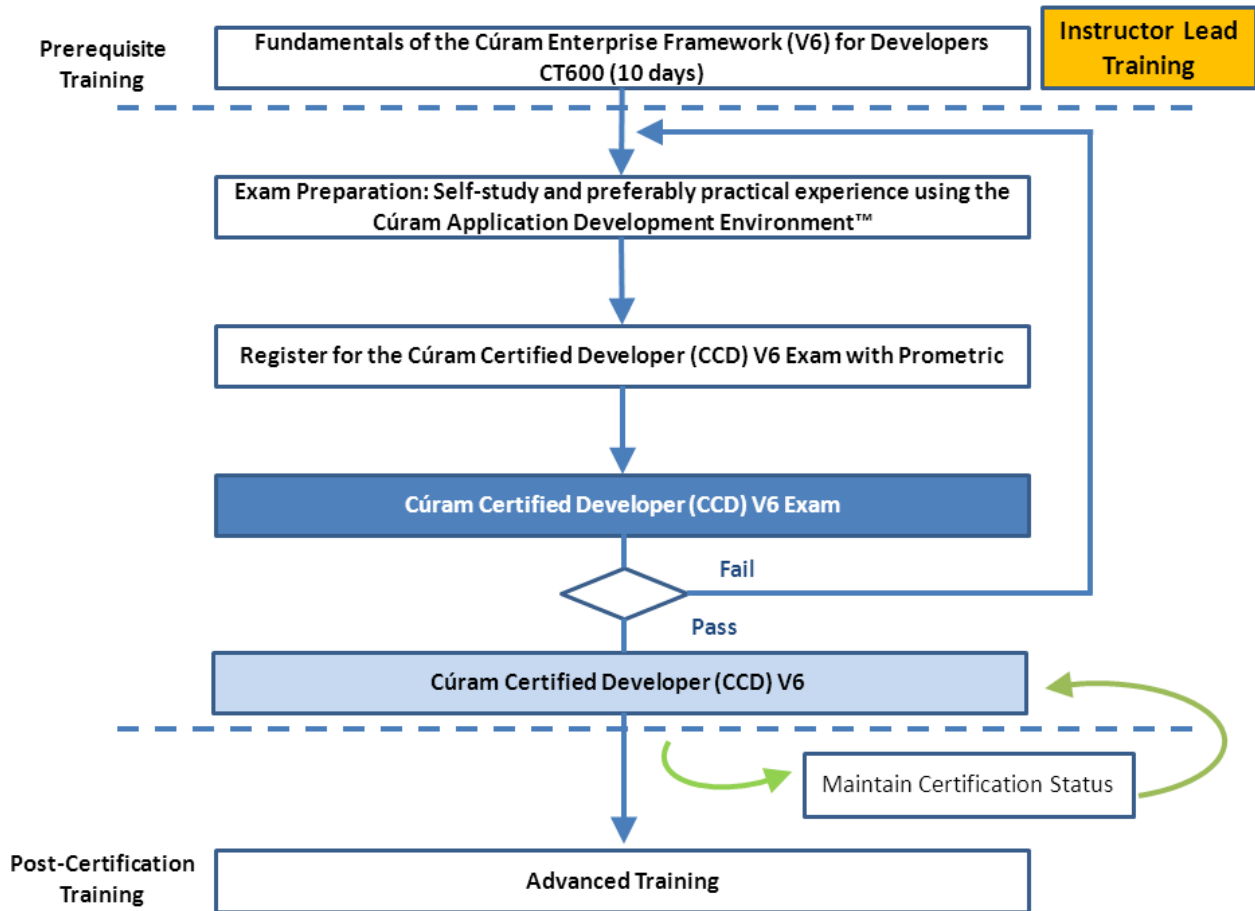

## Job Role/Audience

The target audience consists of Java developers who will work as Cúram developers.

## Exam Details

Evaluation method:	Computer-based testing
Exam type:	Multiple-choice (single and multiple-answer)
Number of questions:	40
Duration:	60 minutes
Passing grade:	70%
Resources:	None, closed book
Location:	Authorized worldwide Prometric testing centers

**CCD V6 Certification Process:**

**Registering for an Exam**

You can register to take your exam at a time that suits you in any one of the 5,000 authorized Prometric testing centers. Instructions for registering for an exam can be found on the Cúram website.

**Required Training**

Fundamentals of the Cúram Enterprise Framework (V6) for Developers (CT600).

### Exam Topics

Area	Weighting	Topics
Server Modeling	30%	Domain definitions; Struct classes; Process classes; Façade classes; Entity classes; Shadow types; RSA packages and the CODE_PACKAGE option; attribute options; entity operations (stereotypes); subclassing; extension; domain definition overrides; assignments; aggregation; index; foreign key; and generated class hierarchy.
Server Development	30%	Exception handling; Informational Manager; Data Manager; Application navigation (sections, tabs, section shortcut panels, etc...); Message files; Code tables; infrastructure validations; Domain plug-ins; custom validations; address tables and configuration; generated server artifacts and code; customizing server artifacts; relevant properties; and configuration settings.
Client Development	25%	Common UIM elements; accessing server-side functions; passing parameters between pages; images and containers; UIM views; UIM generator; select lists; Cúram menus; Localization; client customization; relevant properties; and configuration settings.
Cúram Infrastructure	15%	CBAS™ structure (enterprise modules, business process modules, CEF functions); Cúram architecture and application structure; Application Development Environment (development tools, handcrafted and generated artifacts, directory structures); build targets and generation process; configuration and properties files; Cúram Documentation Center; and CIARA, Documentation Center and standalone versions.

### Certification Preparation

To prepare for this exam, you must perform the following tasks:

- Master the material presented in the course manual
- Gain hands-on experience of using the Cúram ADE

The amount of exam preparation time depends on the individual candidate. However, you must be prepared to spend an average of 8 hours per week for 8 weeks to prepare for the exam.

### Maintaining Certification Status

Certifications are currently valid for all V5.2 and V6 versions of Cúram. This policy is in line with the end-of-life support policy for product versions. It is recommended that you maintain your certification on the latest version to keep up-to-date with the new functionality and features introduced in product releases.

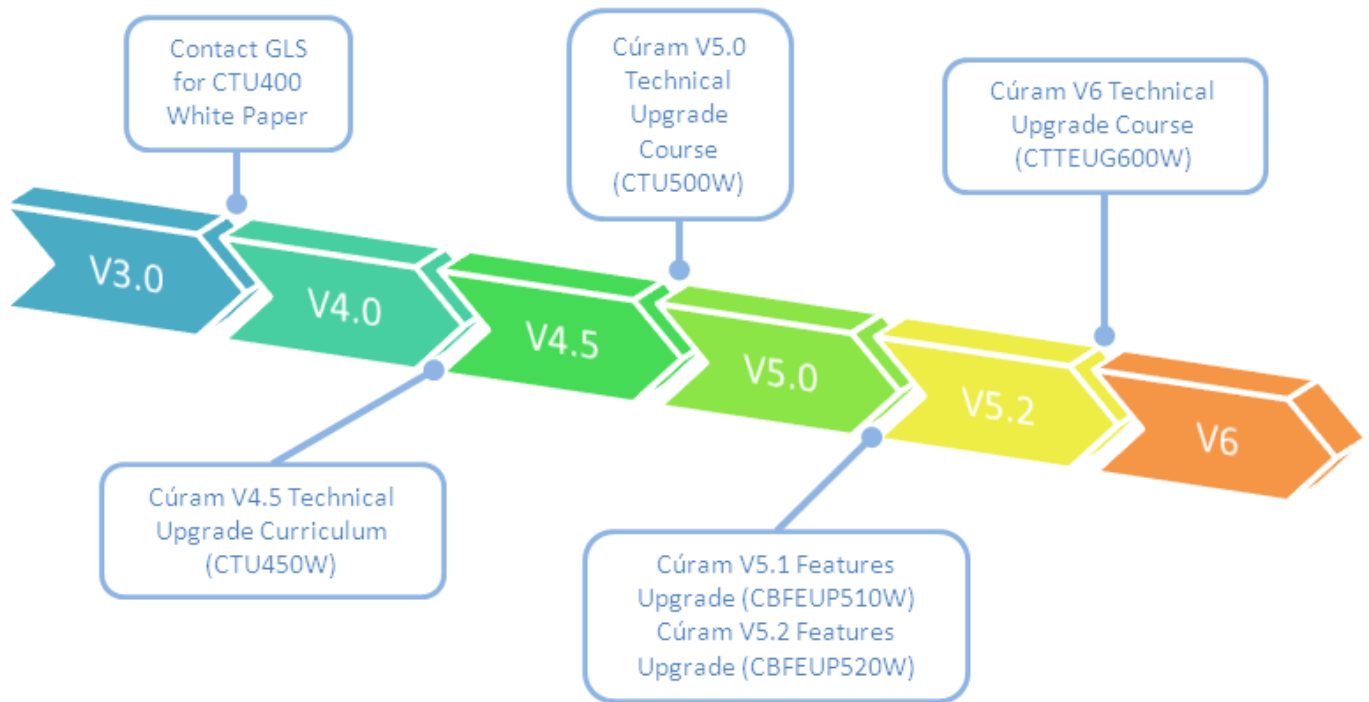

### Further Training

Cúram-Certified Developers may wish to take the following advanced courses:

- Fundamentals of Cúram Rules and Evidence for Developers (CT603)
- Fundamentals of Cúram Workflow for Developers (CT608)

**Upgrading to CCD 6**

The diagram below summarizes the steps for upgrading certifications for Cúram V3.0, Cúram V4.0, Cúram V4.5, and Cúram V5.0 to the corresponding Cúram V6 certification. Upgrade courses are available via the Cúram eLearning Passport™.

*CCD 6 Certification Upgrade Paths*

Full details of the Cúram Certification Policy can be found on the on the Cúram website.

### **Warning**

You may encounter several fraudulent websites offering “Cúram practice exam resources”. These websites do not have practice exam questions and have no authorization from Cúram to sell or otherwise distribute certification exam materials.

### **Cost**

Attending the Fundamentals of the Cúram Enterprise Framework (V6) for Developers (CT600) entitles all learners to one free exam attempt, provided the exam is taken within 90 days of the completion of the training course. There is an exam fee of \$150 USD (or local equivalent) for each exam retake and attempts outside of the 90-day window.
